The penalties being placed on Microsoft is a disservice to "Free Enterprise", also, a disservice to the world. The companies/States that are crying should be told to go home and "think of a better way". If the Gov't, DoJ, etc want to get onto something or make a name for themselves, they should go after the "Cable/Elec/Water Companies", now there is a monopoly. Everyone is at the mercy of their rates/rules/etc.

Microsoft has gone out of their way to make the cry babies happy, but nooooo, some just want more out of an Enterprising Company.
